

前端待办与消息的嵌入设置

任务中心-业务待办-办理嵌入逻辑

数据请求接口

<https://zjsj-test.pinming.org/workcenter/api/task-center/businessTask/findBusinessTaskList?busiType=1&initiateTime=&finishTime=&completeTime=&completeFinishTime=&plugType=>

根据前端代码逻辑分析

- 1.通过 applicationType 字段进行处理跳转具体的路由，即前端写死的路由配置。(注：applicationType 是嵌入应用的应用类型)
- 2.可透传到目标页面的参数为：taskId 和 detail
- 3.currentUser.type 企业(1)和项目(2)，默认是在企业下展示，前端写死，如果都支持，可以新加
- 4.字段含义：任务描述—detail，所在组织—organize，业务类型—applicationType，发起人—initiateMemberName，发起时间—initiateTime，任务状态—taskStatus

```
const goToDetail = (num, id?: any, detail?: any) => {
  let src = '';
  if (num === 20) {
    // src = `${window.location.origin}/console/agreement/#/agreement-front/agreementHome/complaintDetail?complaintId=${id}&common=true`
    src = `${window.location.origin}/console/agreement2/#/agreement2-front/agreementHome/appealHome?page=appealDetail&appealId=${id}&common=true`;
  } else if (num === 13) {
    src = `${window.location.origin}/console/feedback-channel/#/feedback-channel-front/messageHome/messageFeedbackDetail?feedbackId=${id}&common=true`;
  } else if (num === 22) {
    src = `${window.location.origin}/notice/#/notice/preview?id=${id}&type=check`;
  }
}
```

```
    } else if (num === 25) {
      if (detail.includes('加签')) {
        src = `${window.location.origin}/console/app-assent/#/app-assent/application/HandelExamine/${id}?sign=1&common=true`;
      } else {
        src = `${window.location.origin}/console/app-assent/#/app-assent/application/HandelExamine/${id}?&common=true`;
      }
    }
  }
  return src;
};
const tapItem = () => {
  callBack?.(goToDetail(record.applicationType, record.taskId, record.detail), record);
};
```

数据请求接口

<https://zjsj->

test.pinming.org/home/api/front/msgcenter/taskMsgAllList.htm?auto=true

根据前端代码逻辑分析

1. 通过 `message_key` 字段进行处理跳转具体的路由，即前端写死的路由配置(默认 `viewUrl`)。
2. 通过 `viewUrl` 字段确认是否有权限跳转

```

useEffect( effect: () => {
  const he = document.documentElement.clientHeight || document.body.clientHeight
  if (he && visible) {
    setHe( value: he - 145 - size.height)
  }
  if (visible) {
    if (selectMsg && selectMsg.viewUrl) {
      if(selectMsg.viewUrl.includes('?')) {
        const payload = JSON.parse(selectMsg.payload)
        if (selectMsg.message_key === 'helpCenter') {
          setSrc( value: location.origin + '/help-center/#/panshi/help/search/video/helpDetails?id='+payload.id+ '&common=true')
        }
        if (selectMsg.message_key !== 'helpCenter') {
          setSrc( value: location.origin + '/' + selectMsg.viewUrl + '&common=true')
        }
      } else {
        setSrc( value: location.origin + '/' + selectMsg.viewUrl + '?common=true')
      }
    }
  } else {
    setSrc( value: '' )
  }
}, deps: [size, visible])

```

```

{
  selectMsg && selectMsg.viewUrl && (selectMsg.viewUrl !== 'questionnaire_message_key') && (
    <div className={Styles.iframeWp}>
      <iframe
        className={Styles.iframeScroll}
        style={{border: 'none', padding: 0, margin: 0}}
        width={'100%'}
        height={he + 'px'}
        src={src} />
      </div>
    )
}

```
